

portable 3.1A Dual Port USB Car Charger

Quick Details

Brand Name:Schitec

Model Number:CC134

Use:Mobile Phone

Type:Electric

Place of Origin:Guangdong, China (Mainland)

Port:2 x USB

Socket Standard:EU/AU/UK/US

Color:Red Grey etc

Size:20.4mm*25.5mm*51.6mm

Weight:16.4g

Input:DC12-24V

Output:5V 3.1A

Test:100% test before delivery

Warranty:12 months

Material:Metal

Product name:portable 3.1A Dual Port USB Car Charger

Packaging & Delivery

Packaging Details Poly bags/blister packing/customized package

Delivery Time 3-20 working days after payment

Product Description

1	Model	CC134
2	Color	Red Grey etc
3	Size	20.4mm*25.5mm*51.6mm
4	Weight	16.4g
5	Input	DC12-24V
6	Output	5V 3.1A
7	Test	100% test before delivery
8	Material	Metal
9	Promise	Good quality, price and after-sale service
10	OEM & ODM	Support
11	Packaging	Poly bags, blister, window box or customer requests

Q: What about your packaging? Can you offer OEM packaging?

A: All products come with neutral retail packaging. We can offer OEM packaging and manual according to customer's request.

Q: How about the warranty?

A: 12 months guarantee

Does The Car Charger Waste Power When The Load Is Not Connected?

Many people are concerned about whether the car charger consumes power. When the car charger is not connected to a load, is it the same as the power consumption?

Although 80% of vehicles are powered by the cigarette lighter after the vehicle has pulled out the key, some car cigarette lighters continue to supply power. If the owner forgets to remove the car charger, will it damage the vehicle battery? When the car charger is not connected to the load, there is usually no current output. Even if you forget to unplug, only a small LED light is working, and the battery power consumed is negligible.

Almost negligible loss of power, is it right? You can always insert a car charger, even if you do not need to charge? When the car owner is not in use, he should unplug the power connector to prevent the internal spring of the socket from losing its resilience, looseness and imaginary connection after prolonged use. It is also necessary to prevent sudden strong current from burning the device when the engine is started next time.

To choose a car charger, be sure to choose a brand with quality assurance. Schitec, 10 years of quality precipitation!
